Resume Building Guide

Format, Keywords, and Common Mistakes

1. Structure

- Contact info, summary, education, skills, projects,
- internships, achievements, certifications.
- One page for freshers, two pages max for experienced.

2. Write Impactful Bullets

- Start with action verbs: Built, Optimized, Designed, Led.
- Add metrics: improved X% faster, reduced cost by Y, served Z users.
- Format: Action + What + Result.

3. ATS-Friendly Formatting

- No tables, images, or fancy graphics (ATS bots misread them).
- Use standard section headings.
- Match keywords from the job description.

4. Skills Section

- Group into Languages, Frameworks, Tools, Soft skills.
- Rate honestly - be ready to answer on anything listed.

5. Projects

- 2-3 strong projects beat 10 weak ones.
- Include tech stack, your role, and measurable outcome.
- Link to live demo or GitHub repo.

6. Common Mistakes to Avoid

- Typos and inconsistent formatting.
- Generic objectives instead of a tailored summary.
- Lying about skills or dates - it is caught in interviews.
