TCS NQT Preparation Guide

Test Pattern and Section-Wise Strategy

1. Test Pattern (NQT)

- Numerical Ability: 20 Qs, aptitude, percentages, ratios.
- Reasoning Ability: puzzles, series, coding-decoding.
- Verbal Ability: grammar, reading comprehension.
- Programming Logic (pseudo-code based).
- Optional: Coding round (2 problems).

2. Numerical Ability Tips

- Master percentages, profit-loss, time-work, speed-distance.
- Learn shortcut methods for average and ratio problems.
- Practice 10-15 questions daily with a timer.

3. Reasoning Tips

- Number/letter series, analogies, syllogisms.
- Blood relations, directions, seating arrangement.

4. Verbal Tips

- Vocabulary (synonyms, antonyms), sentence correction.
- Read one editorial daily for RC speed.

5. Programming Logic

- Understand C/Java/Python code snippets (output, errors).
- Know loops, conditionals, arrays, basic OOP.
- Practice pseudo-code MCQs from previous papers.

6. General Advice

- No negative marking in most sections.
- Attempt all questions; manage time per section.
